QUESTION: In regards to the recommendation that interested agencies send two representatives to the meeting scheduled for November 4th, is this because there will be concurrent information sessions, or will one agency representative be able to receive all of the information that will be provided?

ANSWER: IHCDCA recommends that the agency Executive Director (or their surrogate) in addition to a counseling practitioner attend the November 4th meeting. It is extremely important that agency leadership and staff with counseling expertise within one agency both understand this program requirements and how it will interact with other similar programs already in place at the agency.
